

EasyGuide

**GPS Multimedia Passenger Information
and Commentary Systems**

System Options

Passenger Information Made Easy...

EasyGuide GPS Multimedia Passenger Information and Commentary Systems keep passengers informed and entertained whilst also giving operators an opportunity to earn revenue from advertising.

EasyGuide can be configured to trigger different types of media at each play point. Available functions depend upon the product licensed, but EasyGuide is scalable and can be upgraded to meet your growing requirements.

EasyGuide is available as a multi-language or single-language system, with or without a passenger screen.

Even if you install a single language version of EasyGuide, you can select the language to broadcast at the beginning of the trip – ideal for language groups!

City Buses - Airport Shuttles - Sightseeing Tours – Trains – Boats – Limousines - City Tours - Park and Ride Buses

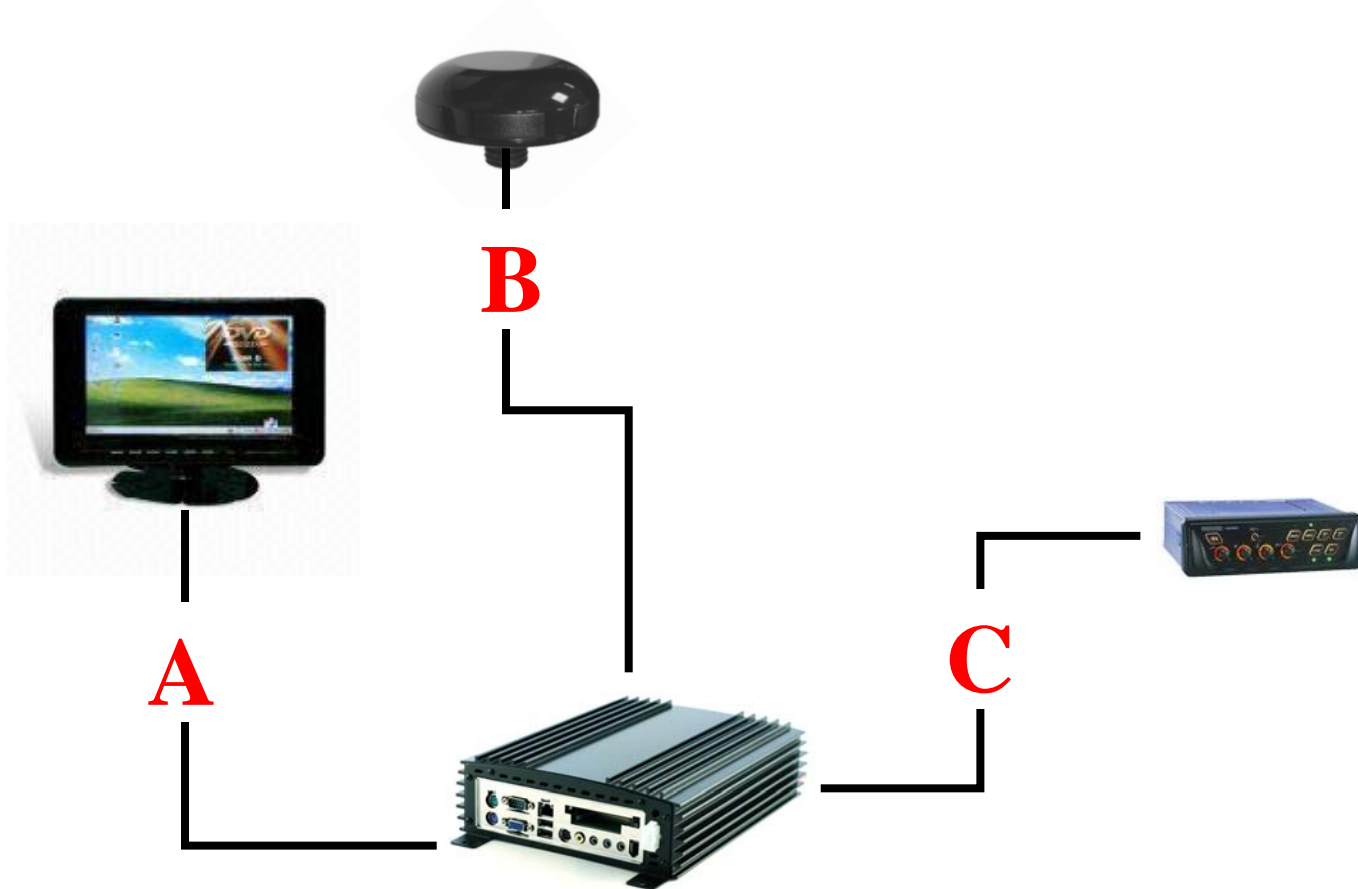

Broadcasting pre-recorded audio and visual media at defined GPS locations has many advantages. It means you have complete control over what is said, or displayed on the passenger screens. And your media content is the same quality every trip.

There is an EasyGuide system to suit your needs...

System/Function	EasyGuide Audio Player	EasyGuide Video Player	EasyGuide Media Player
Plays recorded sound files	◆		◆
Plays Tracks From DVDs		◆	◆
Show Live TV		◆	◆
Display Pictures			◆
Play Video Clips			◆
Display Schematic Maps			◆
PowerPoint Presentations			◆
